

35 YEARS IN BUSINESS

Finn Defense is part of Finn BV, a Dutch based company specialized in the engineering and production of high precision components from metal and plastic. Started as a small company in 1980, today Finn BV is specialized in CNC machining with a high accuracy in which the order size can vary from a few to thousands of pieces. Additionally Finn BV has its own assembly department, several possibilities for surface finishing and Finn BV offers support in material selection and logistics.

Through the years, Finn Defense developed and produced various types of products for the defense industry, like components for the turret of the CV90 infantry fighting vehicle and high-tech measuring systems. Finn Defense also obtained the European dealership of the compact lightweight combat vehicle RP Strike-M which is ideally for using as a dynamic and flexible reconnaissance or rescue vehicle for the military, police, security, fire brigade, ambulance or coast guard.

Finn is your partner for:

- High precision metal and plastic technology
- Engineering and research of prototypes
- Mechatronics
- Production of optical parts
- Turnkey projects
- Compact lightweight combat vehicles
- Finn is member of the Royal Metal Union
- Finn has over 35 years experience in exporting to Europe and North America
